

Our Vapour Recovery Services include Preventative Maintenance, Compliance and HMC Testing; all aimed at optimising unit performance and reliability.

Preventative Maintenance Services:

- Safety System Testing (Cause and Effect)
- Gas Analyser / Instrument Calibration
- System Operation Checks per OEM Data
- On Site Repairs & Replacement

Performance Testing:

- 3 yearly compliance testing in accordance with local authority legislation.
- HM Customs & revenue tests carried out at duty suspended installations for the reclaim of duty on recovered product.
- Capacity Testing – performance of unit compared to manufacturers data.

Consultancy:

- Commissioning of new plant
- Carbon replacement
- Programmable Logic Controller (PLC's) replacement and modifications
- Human interfaces
- Decommission of aging plant
- Risk assessment and operability studies:
- HAZOP, LOPA and SIL assessments
- Corrective actions and system modifications to comply with Safety Integrity Level

If your plant may benefit from our VRU Services, please don't hesitate to get in touch.
